# SUNCARE

---

HIGH NATURAL  
SUN PROTECTION

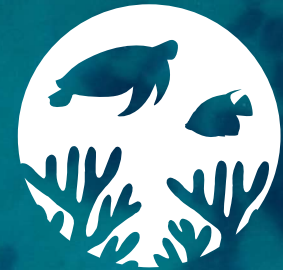

**FOR EVERYONE THAT WANTS  
TO SAFELY ENJOY THE SUNSHINE,  
OUR SUNCARE PRODUCTS GUARANTEE:**

- › **dual protection** against harmful effects of the sun:
  - › **mineral screens:** 100% natural origin, **UVB/UVA protection immediately on application** ( $\neq$  synthetic chemical filters, protection after 20-30 min),
  - › **Alga-Gorria®:** patented extract of red seaweed, powerful anti-oxidant capacity, neutralizes free radicals for cellular **protection and prevention of the signs of aging.**
- › an **optimal UV spectrum coverage** (long and shortwave UVA and UVB) and **cosmetic effect** (minimal whitening effect as compared to formulas with 100% TiO<sub>2</sub>) thanks to the combination of titanium dioxide and zinc oxide,
- › **guaranteed effective protection:** *in vivo* tests for UVB (norm ISO 24 444); *in vitro* tests for UVA (Erythema method) confirmed with *in vivo* testing (norm ISO 24 442),
- › **optimal skin tolerance:** inert mineral screens; allergen free; formulas without preservatives or at minimal concentrations; high SPF (50 or 50+); no added fragrances; hypoallergenic sunscreens for children,
- › highly water resistant:
  - › stays on the surface of the skin preserving the oceans,
  - › provides sure protection of children playing in the water,
  - › sweat resistant, does not irritate the eyes during sporting activities.

For very sensitive or intolerant skin, the SPF50 and SPF50+ sunscreen products do not contain added fragrances. SPF30 products have a natural-origin, delicious "coconut-shea butter" fragrance (except for the SPF30 Tinted Face Cream, with natural-origin vanilla fragrance). Airless packaging for longer lasting formulas.

RESPECT  
THE SKIN &  
THE OCEAN

### THESE TWO PLEDGES WERE THE ORIENTATION OF OUR SUNCARE PRODUCTS

In this way, when we design our formulas our R&D does what it takes to guarantee Suncare safe for the health and the environment:

- › **certified Organic:** "clean" formulas, without petrochemical origin ingredients, non-biodegradable silicones,
- › **100% natural origin mineral screens** ( $\neq$  ecotoxic synthetic chemical filters potentially allergenic, irritant and ecotoxic),
- › **99.5% to 100% natural-origin ingredients** in formulas,
- › biodegradable ingredients.

## RESPECT THE SKIN

As a dermo-cosmetic skincare laboratory, keeping your skin healthy is our absolute top priority.

In this way, the mineral screens titanium dioxide and zinc oxide in our Suncare are inert, high-tolerance molecules. They do not cause allergies or irritation and may be applied on any skin type, even the most fragile.

In the formulas, the titanium and zinc **agglomerates in voluminous masses that stay on the surface of the skin** to reflect away UV light.

### SKIN PENETRATION STUDY

To confirm the safety of our Suncare, we **tested product skin penetration** in partnership with other Organic sunscreen product producers<sup>1</sup> (study performed on Frantz cells according to OCDE 428 guidelines). It proved that the **mineral screens titanium dioxide and zinc oxide do not go through the skin**. They stay on its surface and as such do risk being present inside the body.

<sup>1</sup>Organic Sunscreens Collective (9 labs): Laboratoires de Biarritz, Alphanova Sun, Cattier, Acorelle, Biosolis, Bioregena, Inavive Lab, Omum, Pur Eden.

# RESPECT THE OCEAN

Source of life and diversity, source of our inspiration, the ocean must be protected.

We have scientifically demonstrated the safety of our Suncare products on marine life with the help of ecotoxicity testing undertaken by a **specialized and independent laboratory**. These trials used **extreme conditions**, in order to create higher ecotoxicity risk than found in real-life ocean conditions. They were carried out on a selection of marine organisms to have a **broad outlook of toxicity risks in marine fauna**.

## TESTING ON MARINE ORGANISMS

Tests were carried out on the Suncare product with the highest concentration of mineral screens, titanium dioxide and zinc oxide. Testing was performed on the algae *Phaedactylum tricornutum* and the crustacean *Artemia salina*. Tests demonstrated that the Suncare products are non-toxic for both of the organisms studied: **no effect was shown on their growth**.

## TESTING ON CORALS

Tests performed with Suncare product with the highest concentration of zinc oxide and titanium dioxide. To assess toxicity for corals, polyp retraction and bleaching of coral nubs. Study performed on coral (*Seriatopora hystrix*) nubs.

The testing concluded on an absence of danger for the parameters studied: bleaching and polyp retraction.

**Our Suncare products are CORAL SAFE.**

These studies provide proof of the **lack of ecotoxicity of mineral screens** but also of the **formula as a whole** because a Suncare product is not just made up of filters. Every ingredient was rigorously chosen according to its environmental impact.

## SUN CREAMS SPF30 & SPF50 FACE

50ml airless pump bottle, recyclable  
Recyclable case made with FSC cardboard, plant-based inks

### SPF30 SUN CREAM

#### High protection

INGREDIENTS: **titanium dioxide and zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: anti-oxidant; **Organic aloe vera**: moisturizing, soothing; **Organic glycerin** (colza origin): moisturizing; **talc**: matifying.

99.6% total natural-origin ingredients.

22% of the total ingredients are from organic farming.

### SPF50 SUN CREAM

#### High protection

INGREDIENTS: **titanium dioxide and zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: anti-oxidant; **Organic aloe vera**: moisturizing, soothing; **nourishing complex made of Organic plum oil and organic sunflower oil**: relief, suppleness; **Organic glycerin** (colza origin): moisturizing; **talc**: matifying.

99.6% total natural-origin ingredients.

16% of the total ingredients are from organic farming.

+ Sun protection and genuine moisturizer. Prevents skin aging. Light texture.

<sup>1</sup>Formulated to minimize risk of allergy.

## SUN LOTIONS SPF30 & SPF50 FACE & BODY

100ml airless pump bottle, recyclable  
Recyclable case made with FSC cardboard, plant-based inks

### SPF30 SUN LOTION

#### High protection

INGREDIENTS: **titanium dioxide and zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: anti-oxidant; **Organic glycerin** (colza origin): moisturizing; **Organic matricaria extract** (European chamomile origin): soothing.

99.5% total natural-origin ingredients.

21% of the total ingredients are from organic farming.

### SPF50 SUN LOTION

#### High protection

INGREDIENTS: **titanium dioxide and zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: anti-oxidant; **Organic shea butter**: nourishing; **Organic coconut oil**: moisturizing, protective.

100% total natural-origin ingredients.

20% of the total ingredients are from organic farming.

+ Rich texture ideal for dry skin types. SPF50 is hypoallergenic<sup>1</sup>.

## SUN SPRAYS SPF30 & SPF50+ FACE & BODY

100ml airless pump tube, recyclable  
Recyclable case made with FSC cardboard, plant-based inks

### SPF30 SUN SPRAY

#### High protection

INGREDIENTS: **titanium dioxide and zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: anti-oxidant; **Organic sunflower oil**: moisturizing, restructuring; **Organic coconut oil**: moisturizing, protective.

100% total natural-origin ingredients.

30% of the total ingredients are from organic farming.

### SPF50+ SUN SPRAY

#### Very high protection

INGREDIENTS: **titanium dioxide and zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: anti-oxidant; **Organic sunflower oil**: moisturizing, restructuring; **Organic coconut oil**: moisturizing, protective.

100% total natural-origin ingredients.

12% of the total ingredients are from organic farming.

+ Fluid texture. Easy to apply. SPF50+ is hypoallergenic<sup>1</sup>. For use from ages of 6 months and up.

## LIP BALM OCEAN & MOUNTAIN SPF30

15ml tube with beveled tip, recyclable  
Recyclable case made with FSC cardboard, plant-based inks

### SPF30 LIP BALM

#### High protection

INGREDIENTS: **zinc oxide**: anti-UVA / UVB; **Alga-Gorria®**: antioxidant; **Organic jojoba and castor oil**: moisturizing, suppleness; **Organic beeswax**: protective; **essential fatty acids = omega 3 and 6** (safflower based): relief, suppleness.

100% natural origin of total.

29.5% of the total ingredients are from organic farming.

+ Lips sheltered in a nourishing and protective "cocoon". No added fragrance. Hypoallergenic<sup>1</sup>. From ages 3 and up.

# SUNCARE

## Baby & Children

### FROM AGES 6 MONTHS AND UP

*Suitable for all skin types.*  
*Fluid texture. Easy to apply.*  
+ *No added fragrance. Hypoallergenic¹.*  
*From ages 6 months and up.*

¹Formulated to minimize risk of allergy.

# TINTED SUN CREAMS

## DAILY PROTECTION AGAINST UVS & PHOTOAGING, UNIFIED SKIN TONE

Protection against the negative effects of the sun is not just for the summer or during winter sports, it must also be done daily, even in the city. Indeed, you can also get sunburned by UVBs walking around the city, at outdoor cafés, even when it is cloudy. As for UVAs, they occur year-round and are responsible for accelerating skin aging through the generation of free radicals.

As comprehensive skin care products, the Tinted Face Sun Creams protect against UVA and UVB, unify your skin tone, moisturize the skin, and protect against aging thanks to Alga-Gorria®, a patented antioxidant ingredient.

There are 4 tints available:

To get a tone that suits your complexion, do not hesitate to mix several tints!

## TINTED SUN CREAMS SPF30 FACE

Perfect your Skin Tone,  
Healthy Look, Powdered.

50ml airless pump bottle, recyclable  
Recyclable case made with FSC cardboard, plant-based inks
